

HVAC Duct Cleaning and Disinfection

Clean air has never been so important. Improve the indoor air quality in your home or business and help prevent the spread of germs from viruses like the flu and COVID-19 with duct cleaning services from Alliance Environmental Group, an F.W. Webb Company.

- Leading health experts believe vaccines, testing and improving indoor air are key to controlling the coronavirus pandemic¹
- The COVID-19 variant list is expanding
- Safeguard your employees and your property
- Keep your operations running smoothly

Benefits

- Improve air circulation
- Increase the efficiency of your heating and cooling systems
- Eliminate contaminants such as bacteria, viruses, dust, pollen, volatile organic compounds and more

HVAC Duct Cleaning Process

First, we prepare the access locations in the system, then evaluate the duct work condition and implement the following cleaning techniques. Once complete, we seal and reassemble the system components.

- Vacuuming the HVAC system
- Agitating and cleaning the interior of duct work surfaces using air-powered brushes
- Applying a disinfection agent throughout the system

More Than Duct Work

As an added precaution, we use an electrostatic spraying mist with an EPA-approved disinfectant to help prevent and stop the spread of COVID-19 and the Delta variant (SARS-CoV-2) in your office, warehouse, laboratory and common areas.
