

Alliance Environmental Group Adds HVAC Duct Cleaning Service

Bedford, MA (April 1, 2021) – Alliance Environmental Group (AEG), an F.W. Webb Company, is pleased to announce that they have acquired Clean Air Duct & Vent Cleaning, a premier vent cleaning business based out of Gloucester, MA. The company’s services include but are not limited to air vents and duct cleaning for dryers, air conditioners and forced hot air.

According to the Environmental Protection Agency, most people spend about 90 percent of their time indoors and they have found that indoor air can be two to five times more polluted than the worst outdoor air.¹ To prevent the buildup of dust, pollen, etc., experts suggest that HVAC air ducts be cleaned every five to 10 years, as well as after construction or a renovation project. In addition, the National Air Duct Cleaners Association recommends that businesses and other large organizations incorporate HVAC duct cleaning as part of their COVID-19 response.

“Due to COVID-19, there has been an emphasis on improving indoor air quality and ventilation to help reduce germs and other pollutants in the air. Clean Air Duct & Vent Cleaning has built a strong reputation among their customers and their HVAC cleaning services complement our list of indoor air quality offerings,” said Felix Perriello, CHMM, CPG, LSP, LEP, President, Alliance Environmental Group.

Clean Air Duct & Vent Cleaning specializes in duct cleaning for both residential and commercial projects and has been offering their services to the greater Boston area for 15 years. Owner, Stefano D’Amico, and his team use large HEPA-filtered negative air machines, mechanical brushes and compressed air tools to clean air duct systems. As a final step to help improve ventilation and remove contaminants, the team applies a disinfection agent throughout the system.

“I’m excited to join the Alliance Environmental Group and bring our high-quality services to residences, businesses and industrial facilities across the Northeast,” said Stefano D’Amico, Owner, Clean Air Duct & Vent Cleaning.

In addition to HVAC duct cleaning, Alliance Environmental Group offers air quality testing and viral disinfection services to improve indoor air quality. Backed by F.W. Webb, Alliance Environmental Group is also supported by their extensive inventory of HVAC systems and related disinfection products and HVAC technicians.

About Alliance Environmental Group

Alliance Environmental Group provides environmental testing, remediation and engineering consulting services across the Northeast and tri-state area. Staffed by highly experienced scientists and engineers, services include site assessments, hazardous materials management, facility regulatory compliance, capital improvement programs, engineering design, emergency spills and more. Helping clients address their environmental needs quickly and cost-effectively since 2001, AEG joined the F.W. Webb Company in 2016. Visit allianceenvironmentalgroup.com for more information.

About F.W. Webb

An industry pioneer since 1866, F.W. Webb Company is the largest wholesale distributor of plumbing, heating, HVAC, refrigeration, pipe, valves and fittings in the Northeast. F.W.
