

Alliance Environmental Group Welcomes First Meteorologist to the Team

Bedford, MA (December 10, 2019) – Alliance Environmental Group (AEG), an F.W. Webb Company, is excited to announce the addition of their first Meteorologist to the team. Located in Warwick, R.I., Matthew DiPirro will be responsible for regulatory air emissions permitting and compliance, due-diligence, hazardous waste site assessment and climate modeling.

“Matt has a diverse background that will help us better support our air emissions modeling and hazardous materials projects,” said Felix Perriello, CHMM, CPG, LSP, LEP, President, Alliance Environmental Group. “With his background comes a deeper understanding of the relationship between atmospheric chemistry, physics and airborne hazardous pollutants.”

Matt’s passion for weather began at a young age growing up in the suburbs of Boston, where Nor’easters would frequently bring extreme conditions ranging from heavy snow and wind to flooding. That interest took him to Lyndon State College in Vermont, now known as Northern Vermont University. He graduated in 2011 with a Bachelor of Science degree in atmospheric science, concentrating on the private sector and broadcasting. While at Lyndon, he worked at the Vermont Institute of Applied Meteorology as a Senior Road Forecaster and Analyst for special projects in the energy industry. After graduation, he took his first job at the

ABC affiliate in Lawton, Oklahoma, KSWO-TV. He was their lead storm chaser for several years and in 2018 he was promoted to Chief Meteorologist. Matt is also a member of the American Meteorological Society.

When not chasing Oklahoma tornadoes, Matt served as a volunteer Fire Captain for the Valley View Volunteer Fire Department in Lawton, where he earned several national certifications including Firefighter 2 and Hazardous Materials Operations. He is also a Nationally Registered EMT-B. He loves spending time with his wife, Angela, and their young son, Jameson. They like to go boating and look forward to exploring all that New England has to offer.

About Alliance Environmental Group

Alliance Environmental Group provides environmental testing, remediation and engineering consulting services across the Northeast and tri-state area. Staffed by highly experienced scientists and engineers, services include site assessments, hazardous materials management, facility regulatory compliance, capital improvement programs, engineering design, emergency spills and more. Helping clients address their environmental needs quickly and cost-effectively since 2001, AEG joined the F.W. Webb Company in 2016. Visit allianceenvironmental.com for more information.

About F.W. Webb Company

In business for more than 150 years, F.W. Webb Company is the largest wholesale distributor of plumbing, heating, HVAC, refrigeration, pipe, valves and fittings in the Northeast. The company maintains an extensive inventory of products covering 15 areas of expertise for commercial, residential, industrial, and institutional customers. Specialty markets include process controls, water works, environmental services and more. F.W. Webb also operates more than 45 Frank Webb Home bath, kitchen and lighting retail showrooms.
